- Curb Painting & Marking
- Chain Link & Wood Fencing
- Gate Repair
- Wrought Iron Installation & Painting
- Welding
- Janitorial Services
- Park & Playground Inspection
- Graffiti Removal & Project Clean-Up
- Holiday Decoration installation
- Hauling & Disposal
- 24 Hour Emergency Services

#### Park & Playground Services:

- Park & Playground Safety Audits
- Periodic Safety Inspections
- Risk Management
- Maintenance and Repairs
- Plastic Welding
- Complete Playground Refurbishing
- Rubber Surface Repair & Maintenance
- Rubber Surface TopCoat Sealer and Design
- Wood Fiber & Sand Installation
- NPSI Certified Playground Safety Inspectors

### The SafePark Program®

**Pressure wash and scrub equipment** with antibacterial cleaner. This not only sanitizes the surfaces for children's safe health, it also cleans and brightens all plastic and metal components. We also remove all gum and stickers. All sand and debris will be cleaned from all joints, corners and edges to expose any possible maintenance/repair needs or hidden hazards.

**Pressure wash and scrub rubber safety surfaces** with antibacterial cleaner to remove embedded dirt, sand, food, gum, soft drinks and foreign substances. This not only cleans the rubber it helps to exposed potential problems that can be corrected before they become dangerous or costly.

**Seal rubber safety surface** with a colored polymer TopCoat. This process will not only revitalize and extend the life of the rubber by protecting against damaging ultra-violet rays and reducing the amount of rubber granules that are worn off by normal use. Top-Coat also incorporates a "Cool Touch" agent which reduces the temperature of the rubber surface and an Antimicrobial agent which helps to protect against the growth of microorganisms and bacteria.

**Loose Fill Sand/Wood Fiber** we will dig test holes in various locations to check for the proper depth of loose fill. We will rake out the loose fill safety surface to level out kick outs (low spots) under the swings, slide exits and other areas where use displaces the loose fill. In addition we will go over the loose fill safety surface with a metal detector to locate and remove metal debris or small metal toys that may cause injury to bare feet. We will also visually inspect the play area for broken glass and any other foreign materials or debris.

**Perform a comprehensive safety inspection and maintenance.** The inspection provides playground owners/operators information on the current condition of existing equipment and the play area; it also identifies hazards and maintenance concerns. It provides expert advice on the need for repairing and/or replacing equipment. The inspection will be performed by a Certified Playground Safety Inspector in good standing with the National Playground Safety Institute. Also at the time of the inspection we will perform routine preventive maintenance. This will include tightening loose hardware and lubricating moving parts

**Prepare a detailed inspection report** which will include an easy to understand inspection summary, with digital pictures and recommendations for addressing the hazards and maintenance needs that are identified during our inspection. We are available meet with staff on-site to review the inspection report. Also based on our findings we will recommend a SafePark periodic safety inspection schedule that will not only help to keep children safe but will also be an invaluable tool for defending potential litigation.

### Pressure Washing

Our pressure washing equipment delivers up to 3000 psi at the rate of up to 5 gpm, heated to 220 degrees. We also have the ability to inject sand and/or a number of cleaning agents into the system for those difficult situations. We also utilize a waste water recovery system to meet the California water run off codes. Our accessories include a 24-inch surface cleaner for powerful use in the cleaning of flat surfaces and 18-foot 3 stage telescoping wands that allows us to clean two story buildings while working from ground level. We also have a variety of portable units to reach those hard to access areas. The following are some areas where we can be very helpful in meeting your cleaning needs:

Graffiti Removal, House and Building Wash Down, Wood Deck Cleaning and Sealing Brick and Block Cleaning and Sealing, Parking Lot and Sidewalk Cleaning, Tennis and Basket Ball Courts, Playground Equipment & Rubber Safety Surfacing, Trash Enclosures, Stucco Wall Cleaning, Picnic Tables, Benches, Barbecues, Monuments, Statues & Plaques

**If it's dirty we can clean it!**
